

Is there a Construction Career in YOUR Future? Find out at Construction Career Day!

Designed to inspire Western Washington high school students toward construction careers, Construction Career Day 2009 invites you and your students to attend!

As one of our country's largest industries, the construction trades are facing a severe shortage of skilled workers. If not addressed, this shortage will increase. It will affect quality, safety, and our industry's overall ability to compete in building the infrastructure needed by an ever-growing population. How can we address this? One way is to educate young people about the tremendous opportunities available in the construction industry. These range from entry-level apprenticeship and hi-tech positions to professional opportunities.

High School Students will have the opportunity to experience an interactive career event and be creatively exposed to career options in the construction industry – plus have a chance to leave their classroom for the day.

Four Interactive & Informational Areas

- **Outdoor Heavy Equipment** – Students are encouraged to operate rigs, tools, and equipment.
- **Indoor Hands-On Construction Activities** – Students can try their hand at activities such as laying mortar on brick, survey map reading, or running a crane simulator.
- **Indoor Information** – Students will be exposed to local Educational Programs, Industry Associations, Apprenticeship Training Programs, and Federal Trainee Programs, etc. These organizations will offer short sessions about their programs and support services.
- **Tour of the University of Washington's Virtual Construction Lab**

More Details

- Each Student Group will be scheduled for a four hour session.
- We recommend two escorts per group of 20 students.
- Please provide the names of your escorts and a list of students upon arrival.
- Lunch is included.
- Construction Career Day will contact you with schedule information two weeks prior to the event.
- For underfunded schools with transportation needs, there is a limited amount of sponsorship available on a first "ask," first served basis. Just call us at 206.284.0061.

Would you like to attend this ground-breaking event?

Here's how:

- Register online at: www.constructionfoundation.org.
- Download a registration form at: www.constructionfoundation.org.
- Or call us at 206.284.0061 and we will be happy to mail you a registration form.

**We look forward to seeing you on September 30 and October 1
at Magnuson Park, Seattle.**
